edgeLMS

edgeLMS is a course management system designed to help educators create effective online learning communities. Creates an all-in-one platform for delivering, internally or to external Partners, a learning environment for all kinds of Organizations.

edgeLMS features include:

- Browser-enabled work environment allows for internal or external (partners) training
- edgeBOX performs user authentication and acts as information repository
- Site, User and Course management with modules for Assignments and Tasks, Chat, Search, Forums, Quizzes, Resources, Surveys and Workshops Modules for a complete learning environment
- Workflow-assisted evaluation

Simplified Deployment and Management

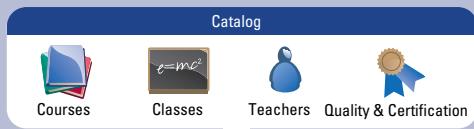

- Simplifies application deployment and license management
- Deal with same partner for edgePACK related issues.

Significant Cost Savings (Capex and Opex)

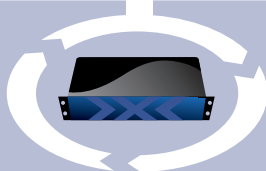

- Low upfront fees with optional support contract (1st year free support included)
- Installation Savings - edgePACK installation takes substantially less time than installing and testing the alternative standalone products
- Ongoing management and maintenance, troubleshooting and security breaches are all minimised
- No additional appliances required

Future Proof

- edgePACKs are regularly updated and new features are added over time.

Distance learning with integrated security

Easily train students and new workers

Guaranteed methodologies of training

edgeEXCHANGE

Advanced Groupware Collaboration Framework

- Calendar, tasks and contacts synchronization with MS Outlook™
- Calendar sharing and meeting schedule via Groupware web interface
- Collaborate on email communications

- Workflow and Task Management
- WYSIWYG editor for unstructured content

About Critical Links

Critical Links is a global provider of converged ICT solutions for Small and Medium Businesses (SMBs) that dramatically simplify and cost-reduce by consolidating a host of advanced voice, data and IT applications over a single platform.

Critical Links' flagship product, the edgeBOX™, is an award winning multi-function gateway that provides VOIP, IP-PBX, VPNS, security, NAC and QoS as well as web server, e-mail server and data storage; It replaces up to 8 separate devices that would otherwise be required to support this breadth of functionality, and is available on a range of scalable and fault-tolerant platforms supporting up to 300 users. Critical Links offers its solutions through a global network of VARs, System Integrators, OEMs and Service Providers. For more information:
